

NIANTIC SPORTSMEN'S CLUB

Skills . . .

Muzzleloader marksmanship at the entry level is one of the least expensive, most rewarding of all the shooting sports.

At the Niantic Sportsmen's Club, there's a lot of expertise available for newcomers -- whether adult or youth. Even for you soot-smudged, black-powder veterans, the challenge of exploring several hundred years of "charcoal-burner" technology is always fascinating.

Equipment . . .

Eye and ear protection are required. A sturdy box that can hold your rifle or revolver, powder and ball, a spotting scope, small tools, and extra loading equipment helps. Take a look on the range and observe how competitors have resolved these needs for themselves. There's no magic; it's all in the history books!

PLANTS DAM ROAD

Flint, Percussion, Rifle, Musket,
Revolver -- Powderhorn or Pellet, Traditional
Sidelock, or Modern Scoped Inline...

Interested?

NSC Muzzleloaders tend to meet on the Outdoor Range on Sunday mornings for friendly target shooting and information exchange. Here's where you learn from the experts, and pick up tips. If you don't own a muzzleloader, it's a great opportunity to see how it's done; if you do have a "smokepole," -- come on down and join in!

PLANTS DAM ROAD

NIANTIC, CONNECTICUT

Traditional Muzzleloaders at the Niantic Sportsmen's Club

Many members of the NSC are interested in black-powder muzzleloader marksmanship and the traditional woodland skills of our ancestors.

Several outdoor-range and forest-trail events are held during the year in winter and summer, in rain or shine -- just like the olden days -- and can benefit local charities as well.

Your fellow marksmen are not only your fellow clubmembers... but past generations of patriots, explorers, plainsmen, and settlers!
